THIS IS AN ENCLOSURE TO 5F
DO NOT DETACH

1. The Polish fishing company Dalmor has received six new trawlers which were produced in East Germany. These trawlers have displacements of about 400 tons.
2. Dalmor has approximately 35 trawlers. The largest is the JOWISZ which has a displacement of 750 tons. Other Dalmor ships, displacing from 350 to 600 tons, are the PLUTON, NEPTUN, NEPTUNIA, SATURN, SATURNIA, KASTOR, KASTORIA and the ORION. Dalmor's ships are used for far-sea shipping, especially in the vicinity of Iceland and the North Sea. The director of Dalmor is Kowalski (fnu). Osowicz (fnu) is personnel chief and secretary of the Party cell.
3. [REDACTED] is of the opinion that lack of fishing equipment and insufficient training of the crews of Dalmor's ships accounts for the fact that hardly 60 per cent of the expected yield is realized.
